ASX RELEASE

Withdrawal from Gonsan Mineral Project

Manas Resources Limited (ASX: MSR) advises that it has withdrawn from an agreement (refer ASX announcement dated 23 January 2018) to earn an up to 85% interest in the Gonsan Project in central south west Côte d'Ivoire, West Africa.

The Gonsan Project comprises 3 exploration permit applications by local company, Gonsan Resources Sarl covering a combined area of approximately 1,000 km². Manas's withdrawal is due to a lack of progress in granting of mineral permits and an assessment that exploration in that part of the country would be difficult, due to terrain, and costly.
